Professional Summary

System Associate Engineer at IBM India, working on a Financial Services project. Experienced in automation testing (Selenium, IQP), API testing, and full-stack development using the MERN stack. Currently building skills in Cloud and DevOps with hands-on learning in Linux and AWS, focusing on scalable systems and efficient deployment practices. Strong problem-solving abilities backed by consistent DSA practice and a quick learning mindset.

Technical Competencies

Programming Languages: C + + , JavaScript, HTML5, CSS3

Operating System: Windows, Linux

Database: MongoDB

Libraries: ReactJS, NodeJS, ExpressJS

Tools: Selenium, VS Code, Git/GitHub, JIRA, IQP, SauceLabs

Education

Chandigarh Group of Colleges, B.Tech - Computer Science Engineering - 7.9 CGPA Aug 2021 - June 2025

Bokaro Public School, Intermediate in Non-Medical - 8.26 CGPA April 2019 - May 2020

Bharat Singh Public School, Matriculation - 8.18 CGPA April 2018

Experience

Associate System Engineer, IBM – Chennai, India Aug 2025 – Present

- Completed 3-month Associate Specialty Training in Quality Engineering – Full Stack, covering manual and automation testing, test case design, and QA tools.
- Contributed to a Banking project involving mobile app redesign, with primary focus on automation testing using Selenium and IQP, ensuring application stability and performance.
- Designed and implemented Combinatorial Test Design (CTD) models to optimize test coverage and reduce redundant test cases, improving testing efficiency.
- Developed and executed automated test scripts, created structured test scenarios, and managed defect tracking using JIRA and Ignite Quality Platform.
- Collaborated with cross-functional teams for requirement validation, regression testing, and continuous quality improvement across releases.

Projects

Delight Food Delivery Application [Link](#)

- A modern web application front-end developed using ReactJS, offering a seamless experience with intuitive UI/UX design functionality for managing food deliveries.
- Tools Used: ReactJS

Quick Lists [Frontend Link](#), [Backend Link](#)

- Engineered 'Quick List,' an intuitive MERN stack to-do app that boasts advanced login/signup functionality via JWT, multiuser capabilities, robust password security with bcrypt, and a beautifully responsive layout.
- Tools Used: MongoDB, ExpressJS, ReactJS, NodeJS

Weather Application [Link](#)

- "My-Weather-App" is a sleek and intuitive weather forecasting application that provides real-time updates,

detailed weather conditions, and location-based forecasts, all wrapped in a user-friendly interface. Stay prepared with accurate weather insights on the go!

- Tools Used: HTML, CSS, JS

Certifications/Achievements

- Associate Speciality Training in Quality Engineer-FullStack by IBM
- ISTQB Certified
- DevOps Essentials by IBM
- Certification in DSA by CodeHelp.
- Frontend Development Training Certificate by Excellence Technologies.
- Certificate of training in Web Development by Internshala.
- Internal SIH runner up - 2023.
- Solved 150+ DSA problems on LeetCode.
